Qualifications Achieved

Duration

4 years

Summary

Through a combination of classroom based and hands on learning in our engineering offices you will be closely mentored to gain the skills required to excel within our technical working environment.

Working to both practical and academic targets you will undertake a series of placements across our engineering departments and study at one of our training partner colleges to develop a full range of skills in your specific discipline

of engineering.

Career Progression

Having successfully completed the programme your future job prospects are excellent as you have gained relevant knowledge, skills and work experience to progress within your engineering discipline.

Entry Qualifications

Higher English, Maths and a science subject plus 5 subjects at National 5 including English, Maths and Physics.

Personal Skills

You will also be expected to be medically fit as deemed necessary to perform the role, be eligible to work in the UK and be able to successfully achieve security clearance.
