

Field Engineer

Provider

BT

Career Areas

Engineering

Programme Title

Field Engineer

Programme Structure

Job Description

As an Engineering apprentice at BT you will be joining a team of experienced engineers who will support and teach you the skills required to be successful in your apprenticeship role.

The Engineering roles are both varied and interesting and offer a great opportunity for you to develop your skills and your career.

This includes maintenance of power equipment such as high powered generator engines, air conditioning units and other electrical safety systems that power the telephone exchange equipment. You may be in a role that requires you to provide a safety testing and repair service to our customers to make sure our equipment meet the legal obligations under Health and Safety legislation.

Wage

£14,963

Hours Of Work

35 hours

Age Limit

16 - 19

Proposed Start Date

September 2018

Locations

Glasgow

Aberdeen
