

Cyber Security Apprenticeship - Higher

Provider

BT

Career Areas

Computing and ICT

Programme Title

Cyber Security Apprenticeship - Higher

Programme Structure

Job Description

Our higher apprenticeship activates UK school leavers to thwart cyber crime, decrypt data and untangle malware. The programme develops a blend of technical skills across digital security, information assurance and risk, to help apprentices onto a fantastic career path into Cyber Security.

During your apprenticeship, you'll be doing a real job. Typically this will be in either our Security Operations Centre, within our security implementation teams, or with our security architects. We also have apprenticeship positions working in some of our more specialised security departments.

You could be helping us secure our own networks, or those of our customers, or assisting in the launch of products through security testing. You might also be involved in helping us investigate fraud or cyber crime, working closely with law enforcements and intelligence agencies.

We'll give you plenty of opportunity to take part in group projects, team building, social activities and training courses that complement your college work.

A BT apprenticeship is an excellent alternative to university, and you'll have a guaranteed job at the end.

Wage

£14,466 a year starting salary

Hours Of Work

39

Age Limit

16+

Proposed Start Date

September 2017

Locations

Edinburgh

Qualifications Achieved

Duration

2-3 years

Summary

You'll have to go to college – typically for two weeks out of every six, and you will be expected to complete college work in between times.

Career Progression

Entry Qualifications

You must have, or expect to achieve, 3-4 Highers, plus 4 subjects at National 5 including English and Maths.

Personal Skills

At BT, we're creating an inclusive working environment where people from all backgrounds can succeed. Diversity makes sense for us, for our customers and for our future. We value different perspectives, skills and experiences, and welcome applications from all sections of the community.

Whatever your background, there are ten particular qualities that we expect everyone here to demonstrate. We call them strengths. Do you share them?

- Learner – keen and quick to grow

- Drive – ambitious to do brilliantly

- Team – supportive of colleagues

- Networker – connects with other people

- Ownership – takes personal responsibility
- Analytical – careful problem solver
- Change – open to doing things differently
- Customer – Passion for the people we serve
- Commercial – fascinated by business
- Efficient – plans to achieve success
