Content

Experience designers create things that better connect us, attract us, involve us and include us. They make our lives easier, more fun and more meaningful, in big and small ways.

This course covers aspects of User Experience (UX) such as: user interface (UI) design and graphic design apps.

You will move beyond mere usage to understand, perceive, connect, and engage people through your designs. You will extend your creativity beyond the screen to create products, services, spaces, and more.

Experience design is where people, technology and design meet.

You will learn industry-ready skills across all of these areas. You will learn how to use them together professionally to take projects from first idea to beautifully crafted outcome.

Start Date

September

Qualification

Degree

Study Method

Full time

Award Title

BSc Hons

UCAS Code

W200
