

# Energy Law with Dissertation

University of Aberdeen

## Venues

Old Aberdeen Campus

## Content

In energy terms, we live in times of great flux. The demand for energy keeps on rising especially as newly developing nations seek new energy and new wealth.

Yet, the paradox is that this explosion of activity is happening precisely at the point in world history when we're also trying to seriously reduce our carbon emissions and the effects of climate change. How to reconcile these two often opposing demands is where energy law becomes pivotal. This market-leading LLM Energy Law is designed to help you specialise and stand out, gaining new insights and new ways forward, in this challenging global arena.

The programme is designed for students with a degree in law or in a related discipline, who want to gain a greater knowledge of how energy law works - and crucially how it is developing over time - providing students with a robust and industry-ready knowledge for a successful career.

## Start Date

September, January

## Qualification

Postgraduate Master's

## Study Method

Full time

## Award Title

LLM

## Course Length

12 months

## Faculty

Arts and Social Sciences

## Department

Law

## Entry Requirements

A 2:1 Honours degree in Law or other relevant discipline.

## SCQF Level

11

## Address

King's College  
Aberdeen  
Aberdeen City  
AB24 3FX
