

Clinical Pharmacology

University of Aberdeen

Venues

Old Aberdeen Campus

Content

Common themes throughout this MSc programme include molecular pharmacology and toxicology within the fields of disease, the drug discovery process and drug design and development. The programme will enable you to access leading academic and industry experts and provide you with valuable networking opportunities. Coupled with the skills and experience that you will gain throughout your studies, your employability and career prospects will be improved.

The MSc is ideal for recent graduates, medics and scientists, who would like to improve their career prospects, fill skills gaps and further their hands-on research experience.
