

## Medical Imaging

University of Aberdeen

### Venues

Old Aberdeen Campus

### Content

The University of Aberdeen has an internationally renowned reputation for the development of new techniques for medical imaging, including being the first place in the world to build and use a whole body Magnetic Resonance Imaging (MRI) scanner.

The use of imaging techniques in medicine has been, and continues to be, an area of vast expansion. The specialities of this programme include the full range of medical imaging modalities, including Nuclear Medicine, Positron Emission Tomography (PET), MRI and Ultrasound.

The University's world class equipment and facilities will provide you with unrivalled insight into medical imaging. Gaining a degree from the University of Aberdeen, with its long history of delivering medical imaging programmes, will add significant credibility to your qualification.

### Start Date

September, January

### Qualification

Postgraduate Master's

### Study Method

Full time

### Award Title

MSc

### Course Length

12 months

### Faculty

Life Sciences and Medicine
