

Sound Design

Edinburgh Napier University

Venues

Merchiston Campus

Content

If you have a passion for sound, and would like to learn how to design it so that it is seamlessly integrated into media, products or environments, then this degree will help you develop an in-depth understanding and the practical skills to design and evaluate effective sound for listeners.

This course will teach you the techniques to create new sounds that coexist with dialogue and music to support a wide variety of media and applications. The underlying principles of linear and interactive media are also addressed, as well as products and environments to maximise potential employment.

Throughout your studies you can specialise in your chosen discipline, and then work towards creating an appropriate portfolio, whilst gaining valuable contacts who could help you during your transition from study to a professional career.

A mix of assignments and projects will give you the chance to collaborate with students on Acting, Digital Media, Film, Games Development and Television degrees.

Start Date

September

Qualification

Degree

Study Method

Full time
