

International Project Management (Energy, Construction Management, Oil and Gas)

Glasgow Caledonian University

Content

Develop the skills to manage international projects successfully. With growing global competition and increasingly complex regulatory structures, international project managers can make a major impact on an organisation's efficiency, and are in high demand.

GCU's MSc International Project Management was designed by senior industry practitioners and leading academic experts. It is delivered by a teaching team experienced in delivering project management expertise spanning all five continents.

This programme offers an elite and highly relevant credential for international project managers. The MSc International Project Management (Energy, Construction Management, Oil and Gas) is accredited by the Royal Institution of Chartered Surveyors (RICS) and the Chartered Institute of Building (CIOB).
