Building Surveying (3rd year entry)

Glasgow Caledonian University

Content

Building surveyors are key professionals within the building management and development related sectors of the Scottish construction industry, advising clients on both commercial and residential building issues.

As a result of the programme's excellence, there is always a high demand for our graduates in Scotland, the wider UK and abroad. Their skills are needed for the analytical building assessment, CAD data recording, design management and improvement of existing properties as well as project management/contract administration within a variety of construction environments.

Building Surveying is an extremely varied profession, with the main areas covered being design, construction technology, conservation, computer-aided design (CAD), professional practice/studies, building pathology, performance, sustainability and regulation.
