Quantity Surveying (with Work Placement)

Edinburgh Napier University

Venues

Merchiston Campus

Content

The course will allow you to learn the skills involved in design economics, procurement methods, cost planning and estimating, life cycle costing, measurement and quantification of construction work and contract management.

In year one you will learn from a broad range of topics to give you a feel for Surveying as a profession including introductions to Construction Costs and Measurement, Building Design and Technology, Property Value Studies and Property and Construction Law.

You will then progress on to more specialist subjects including Cost Planning and Estimating, Measurement and Quantification of Construction and Building Design & Technology.
The third year is spent in the workplace, which is fully credit-bearing towards your final Honours degree. Learning in the workplace provides invaluable experience and allows you to put into practice what you have learned in the first two years as well as preparing you for your final year modules.

In your final year you will work on your Honours project and dissertation as well as gaining enhanced skills in areas of presenting, negotiating, soft skills, Sustainable Development, Advanced Commercial Management, and Conservation Surveying, all of which helps to prepare you for your role in the construction industry.

The course is fully accredited by the RICS and is based on construction economics.

Start Date

September

Qualification

Degree

Study Method

Full time

Award Title

BSc Hons

UCAS Code

K242

Course Length

4 years

Department

Building and Surveying
