

## Human Nutrition and Dietetics

Glasgow Caledonian University

### Content

Human Nutrition and Dietetics is the application of the science of nutrition to the prevention and treatment of disease and the promotion of health.

GCU has the longest running Dietetics programme in Scotland. It provides an in-depth understanding of nutrition and metabolism, gained from the study of physiology, biochemistry, pharmacology and food science, with recognition of the influencing aspects of psychology and sociology.

The programme's strong practical focus centres around problem-based learning in the classroom, nutrition laboratory and clinical simulation lab as well as on placement.

The programme is accredited by the British Dietetic Association and the Health and Care Professions Council (HCPC). It leads to eligibility to apply for HCPC registration (students are required to complete 1000 hours of clinical placement to be eligible) and follows the core curriculum set out by the British Dietetics Association

### Start Date

September

### Qualification

Degree

### Study Method

Full time

### Award Title

BSc Hons

### UCAS Code

B400

### Course Length

4 years

### Faculty

School of Health and Life Sciences

### Department

Occupational Therapy and Human Nutrition and Dietetics
