Nursing Studies (Learning Disability)

Glasgow Caledonian University

Content

Learning Disability nursing involves working in partnership with individuals and families to improve autonomy, promote health and support inclusion. This includes making a real contribution towards enhancing behaviours and lifestyles that help achieve the best health outcomes.

This course focuses on meeting the holistic needs of people with learning disabilities. You will explore key themes within contemporary learning disability practice including meeting health needs, community engagement, person-centred planning, inclusion and integration, addressing health inequalities, legislation, forensic practice, care planning and assessment, evidence-based practice, research methods and appraisal.

You will undertake a variety of practice learning experiences within a variety of health and social care settings.
