Stirling Campus

Content

The health and social care sectors are constantly changing in order to provide better treatment and access to care. Improving health and social care services would not be possible without the work of well-trained researchers.

Our Health Research Masters degree equips you to conduct high quality, rigorous research. You'll benefit from a strong emphasis on both theoretical and practical skills and you'll be supported by a multidisciplinary team of experienced researchers and health professionals.

The course is suitable for diverse backgrounds including medicine, nursing, midwifery, allied health, social work, social and natural sciences. It's for anyone wishing to pursue a career in health research or to study for a PhD.

The course is entirely online, giving you the freedom to work towards a Masters around your personal and professional commitments.

You can exit after stage 1 with PgCert Health Research.

You can exit after stage 2 with PgDip Health Research.
