

## Nutrition

Queen Margaret University

### Content

In Years One and Two you'll forge a solid understanding of the biological sciences. You'll learn the fundamental principles of nutrition and integrate this with knowledge of other related disciplines. Modules will help you develop core study skills as well as laboratory and investigative (information technology and research) expertise.

In Year Three you'll look at how nutrition influences health at the individual, community and population level across all stages of the lifespan. You will learn to evaluate scientific and lay literature, and develop other key professional skills such as communication.

In Year Four you'll focus most of your time on developing your individual research project. You will also choose an elective module that interests you; either Health Entrepreneurship or Nutrition in Practice, which allows you the opportunity to develop a nutritional intervention in a population group of your choice.

### Start Date

September

### Qualification

Degree

### Study Method

Full time

### Award Title

BSc/BSc Hons

### UCAS Code

B403

### Course Length

3 - 4 years

### Faculty

School of Health Sciences

### Department

Health Sciences
