

# Marine and Freshwater Biology

Edinburgh Napier University

## Venues

Sighthill Campus

## Content

Explore the aquatic environment, its importance in understanding climate change, and how to monitor and protect marine and freshwater species in a sustainable manner.

The aquatic realm makes up more than 70 per cent of the Earth's surface and represents the largest domain on earth. This course focuses on the study of the fascinating diversity of life contained in these habitats.

You'll come to appreciate the issues involved in management of aquatic resources and learn how a firm understanding of the organisation of aquatic ecosystems can promote use in a sustainable manner.

Aquatic habitats and organisms are also pivotal in the understanding of climatic change making this course very relevant to a career in conservation and environmental protection.

## Start Date

September

## Qualification

Degree

## Study Method

Full time

## Award Title

BSc Hons

## UCAS Code

C161

## Course Length

4 years

## Department

Biological Sciences

## Entry Requirements

2027 entry requirements

Standard entry:

4 Highers at BBBB including Biology (or Human Biology), Chemistry or Physics.

Widening access entry:

4 Highers at BBCC including Biology (or Human Biology), Chemistry or Physics.

Entry to year 2 requires Advanced Highers at BBC including Biology.

## SCQF Level

10
