Content

Ever wondered why people think, feel, and behave the way they do? From the everyday choices we make to the big life-changing moments, psychology helps you uncover the science behind it all.

A Psychology degree at Stirling lets you explore how the mind works. You'll develop the scientific, analytical, and people skills that employers want.

This undergraduate degree in psychology looks at the uses of psychological science. It addresses real-world problems, from catching criminals to improving health and wellbeing. You'll explore:

How the brain functions; How children develop; How people interact in social groups.

You'll learn from a proactive and supportive team that's passionate about helping students succeed. The British Psychological Society (BPS) recognises our innovative, student-led teaching. The university's personalised support system ensures you feel part of a close-knit community from day one.

Start Date

September

Qualification

Degree
