

## Sustainable Aquaculture

University of Stirling

### Venues

Stirling Campus

### Content

Study at the world-renowned Institute of Aquaculture – a leading international centre in sustainable seafood production and the largest of its kind in the world. The Institute brings together world-class, cross-disciplinary researchers to address a wide range of global challenges facing industry and society.

This programme explores the principles of aquaculture and the key factors influencing the viability of aquatic animal farming and food production systems. You'll develop an understanding of aquatic animal biology, environmental issues, nutrition, reproduction and genetics, disease and health management.

You can also explore the commercial business of sustainable aquaculture, with optional modules covering marketing, business studies and economics. You'll learn the skills necessary to establish, manage and appraise aquaculture enterprises and development projects from within the industry or public sector.

You can choose to specialise in one of four pathways:

Aquaculture and the Environment; Aquaculture Business Management; Aquaculture and Development; or, Aquatic Food Security.

You can exit after 6 months with PgCert Sustainable Aquaculture

You can exit after 9 months with PgDip Sustainable Aquaculture.
