

Environmental Geography

University of Stirling

Venues

Stirling Campus

Content

This Environmental Geography course combines physical and human geography. It gives you an in-depth understanding of the dynamic interactions between people, landscape and global change. You'll develop the skills needed to understand, manage and adapt to them, including the following.

Fieldwork: mapping, surveying, monitoring, sampling, data collection, recording and interpreting field data.

Statistical and data analysis: working with environmental and geographical or ecological datasets.

Advanced geospatial techniques: remote sensing and Geographical Information Systems (GIS).

Research: design and execution of research projects covering contemporary geographical and environmental issues.

Evaluation and problem solving: impact assessment, critical and creative thinking, evaluative discussion.

Start Date

September

Qualification

Degree

Study Method

Full time
