Environmental Geography and Outdoor Education

University of Stirling

Venues

Stirling Campus

Content

This Environmental Geography and Outdoor Education degree blends cutting-edge geographical science with hands-on training in leading outdoor adventures.

On this Environmental Geography and Outdoor Education course you'll:

explore core issues in geography, human impacts on our planet and biogeography; develop skills such as Geographical Information Systems (GIS), statistical techniques and remote sensing; get hands-on field experience in mapping, surveying, monitoring, sampling, data collection, recording and interpreting field data; conduct scientific research covering contemporary biological and environmental sciences.

You'll benefit from the stunning biodiverse campus environment. It has diverse habitats that are used for learning, data collection and sampling.
