

Food, Nutrition and Health

Abertay University

Content

Embark on a fascinating journey to learn how food impacts wellbeing and health, and explore the link between nutrition and public health. Understand consumer food behaviour and develop strategies to improve food habits.

This degree is vocationally relevant and combines academic theory with practical skills in our newly refurbished laboratories.

This programme helps you develop an in-depth understanding of the relationship between food, diet and nutrition and their impact on the wellbeing of the individual. It will enable you appreciate the link between nutrition and public health and you will learn how to develop nutritional strategies to improve the health of the individual or the community.
