Content

Sport and exercise scientists make a valuable contribution to people's lives. They have an important part to play at all levels of sport. At the community level they encourage better health and wellbeing for all. Their skills are also required to enhance athletic performance at the elite level of sport.

You'll learn:

The physiology, biomechanics and psychology of exercise and sports performance; How people learn and enhance motor skills, the role of nutrition and supplements, and the importance of interval and endurance training; Human anatomy and fundamental concepts of chemistry and physics; The latest research in sport and exercise science, from hydration to neuromuscular function; How sport can positively impact individuals, communities and the wider economy.

This Sport and Exercise Science course is endorsed by the Chartered Association of Sport and Exercise Sciences. You'll learn in a world-class environment at sports facilities ranked among the best in the UK.
