

Natural Sciences

Open University in Scotland

Content

Study a specific science or pick and choose from different scientific disciplines. Many challenges facing society today involve a cross-disciplinary approach. So this degree, exploring a range of sciences, is perfect for the modern age. Start with a wide-ranging introduction to highly topical areas of modern science. This will give you a good grounding in each of the branches of science. You can continue with a broad-based approach or focus on a single area of science. The OU OpenSTEM Labs mean you do some of the practical work online. Some modules also give you the opportunity to do hands-on lab work and fieldwork.

The course has routes accredited by the Society for Natural Sciences, the Royal Society of Biology and the Institute of Physics.

Start Date

October, February

Qualification

Degree

Study Method

Online learning

Award Title

BSc Hons

Course Length

Flexible

Faculty

Science

Entry Requirements

There are no formal qualifications required to study this degree. Computer and internet access required.

If you're new to study or to the OU, it is recommended that you start with a course at Level 1.

SCQF Level

10

SCQF Points

«SCQFPoints»

Progression Routes

Science graduates are well placed to enter a range of both scientific and non-scientific jobs. The study of science develops good analytical and numerical skills, and students also become proficient in using computers.
