

Civil Engineering (Level 6)

Glasgow Kelvin College

Venues

Springburn Campus

Content

This Civil Engineering course is intended to provide students with a broad and robust understanding of technical matters appropriate to early involvement in the construction and civil engineering sectors. It will enable students to gain skills relevant to the sectors and support employment opportunities at an early career stage. It is also designed to support academic progress to a higher level.

Civil Engineering: Technology; Materials; Site Work; Project.

Construction: Site Surveying; Substructure; Mechanics; Calculations, Measurement and Costing; Project Management.

Others: CAD; Mathematics; Health and Safety; Sustainability and Environmental Building Science.

Start Date

August
