

Construction Management

Ayrshire College

Venues

Ayr Campus

Content

This course will give you the skills and knowledge you'll need to work successfully in a management role in the construction industry. It's mainly theory based, with a small amount of practical work.

You will: look at substructure; focus on construction technology; develop skills in basic construction planning and programming; learn how to safely manage a site; learn about administrative processes; develop skills in CAD (Computer Aided Draughting); look at common building services; carry out practical tasks.

Options for completing this course on a day release basis are also available.
