

Exercise and Health Science

University of Aberdeen

Venues

Old Aberdeen Campus

Content

In year 1 you will take courses in Sports Science, Medical Science and Psychology or Chemistry. Additional courses are selected from the science programme and other areas.

In year 2, further expansion of Sports Science and development of Exercise and Health studies are provided. These are combined with more advanced studies in Physiology and Psychology or Biochemistry, and courses delivering key skills applicable to Sports Studies.

Year 3 covers Sports Science, Clinical Exercise Physiology and Sports Psychology form important components of year 3, including more specific studies in Anatomy, together with health-related issues including Nutrition, Health and Disease.

Year 4 comprises focused studies on Exercise and Health, the Science of Ageing and Nutrition, obesity and Metabolic Health. An important feature is the ten-week research project, carried out in research laboratories at the University or in local research institutes. If you choose to follow the five year MSci course, your fourth year will be spent on (paid) placement.
