Software Engineering with Emerging Technologies

Glasgow Clyde College

Venues

Anniesland Campus

Content

This course covers a range of disciplines within software development, from core programming fundamentals and data structures to emerging technologies. As well as building your technical skills, you'll learn employability skills and problem-solving, helping to prepare you for a software engineering job in a field that's constantly evolving.

Content includes:
Programming fundamentals; Data structures; Web development; Software security; Emerging technologies.

Start Date

August

Qualification

HND

Study Method

Full time

Course Length

2 years

Department

Computing

Entry Requirements

Higher Maths, Computing Science or a science subject plus National 5 English, or a relevant NQ or equivalent qualification.

SCQF Level

8
