

## Operational Research

University of Strathclyde

### Content

Operational Research (called "Operations Research" in some parts of the world) has been briefly described as the "scientific analysis of decisions". It's concerned with assisting and advising decision-makers in a wide variety of settings.

The MSc in Operational Research aims to realise the potential of graduates, so that you immediately can play an effective role in providing model-based support to managers helping them to make better decisions at an operational/technical level.

You'll develop a rigorous academic understanding of advanced analytical methods that are used to provide structured and analytical approaches to decision-making. You'll also develop practical skills in using operational research models to support decision-makers.

You can exit at the end of 12 months with PgCert Operational Research.

You can exit at the end of 20 months with PgDip Operational Research

### Start Date

October

### Qualification

Postgraduate Master's

### Study Method

Distance and Flexible learning
