

Economics (Combined)

University of Strathclyde

Content

Following the recent global economic crisis, economics is more important and relevant than ever. Decisions on money, banking, interest rates, taxation and government spending affect us all, with global consequences.

Economics aims to understand the activities of the different agents in the economy – consumers, producers and the government – and how they all fit together.

Our degree will give you the ability to explain complex data in simple terms to different audiences. You'll also develop excellent mathematical, statistical and problem-solving skills.

Start Date

October

Qualification

Degree

Study Method

Full time

Award Title

BA Hons
