

Business Analysis and Technology

University of Strathclyde

Content

Business analysis applies advanced analytical methods to business problems to help managers make better decisions while technology is at the heart of all modern business.

Organisations need business graduates with expertise in business technology. Business analysts have an excellent general awareness of how a business works. They're also able to apply advanced analytical methods to deal with specific management issues.

Year 1

Introduction to key areas in business technology, managerial and operational issues in conjunction with analytical tools to support associated decision-making.

Years 2 and 3

Further develop expertise in modelling and analysis to support problem-solving and decision-making; learn the fundamentals of operations management and how information systems are used to enhance key business processes.

Year 4

Carry out a major project for an industry or university client; you take a core class which focuses on analysis and technology in practice and choose from optional classes such as Contemporary Business Technology, Business Analytics Using Data Mining, Project Management, Risk Analysis and Management.
