Content

Learn the skills that bring creativity to life in the real-world utilising technical knowledge. This course includes a fully integrated placement so you will not only learn how to develop great ideas, but how to use commercial design and the latest technology to turn them into successful fashion products.

This course supports you in developing a well-rounded skillset that can help ensure you succeed in a wide range of exciting roles within the fashion industry. You gain a mix of multi-disciplinary skills, practical knowledge which you will confidently apply to real-world experience.

You can take advantage of our links to the garment and fashion industry and you'll be given the opportunity to work on exciting, real-life projects. During your studies, you'll put your skills to the test in an industry setting, giving you the perfect opportunity to make industry contacts and take another step closer to your dream career.
