Kilwinning Campus

Content

This course will give you the in depth knowledge and skills you'll need to work confidently and efficiently in an admin or IT role, and quickly become a valuable member of the team.

A central part of the course will be developing your IT skills to a high level, including extending your knowledge of common software packages.

You'll look at key areas of the admin function, and systems and technologies for the smooth running of a modern office.

You'll look at business communication, learning how to produce high quality business documents, and develop skills for performing effectively at meetings or presentations. You'll learn about the importance of good customer care.

You'll explore social media and how it can be used as a marketing tool. You'll create your own social media marketing campaign, including designing a central webspace. You'll look at various aspects on the financial side of a business. You'll develop your book keeping skills, and learn to use financial accounting software to process transactions and prepare accounts. You'll also learn how to make basic payroll calculations and use commercial payroll software such as SAGE.
