

# Advanced Electrical Power and Energy Systems

University of Strathclyde

## Content

To be an effective power engineer you need a good knowledge of underpinning technologies and user and application requirements. You also require a firm understanding of the business and regulatory landscape that national and multinational power and utility companies must work within.

This course brings together advanced expertise in all aspects of electrical energy and power systems, complemented by studies in electricity markets and power systems economics.

The course is designed to provide the advanced training you need for a career in the dynamic power and energy sectors.

## Start Date

September

## Qualification

Postgraduate Master's

## Study Method

Full time

## Award Title

MSc

## Course Length

21 months

## Faculty

Faculty of Engineering

## Department

Electronic and Electrical Engineering

## Entry Requirements

A first or good second-class UK BEng Honours degree or equivalent overseas qualification in electronic, electrical, power or energy engineering from a recognised academic institution.

## SCQF Level

11

## Address

16 Richmond Street  
Glasgow  
Glasgow City  
G1 1XQ
