

Advanced Mechanical Engineering with Energy Systems

University of Strathclyde

Content

The course will develop your knowledge and skills in the area of energy systems.

It has been developed to enable to become a specialist in the area of energy systems. You'll also have the opportunity to take modules in general skills such as project management and risk analysis. These are necessary skills for any professional aerospace engineer.

It provides high-calibre mechanical engineering graduates with an in-depth technical understanding of advanced mechanical engineering topics together with generic skills that will allow them to contribute effectively in their future roles.

Start Date

January, September

Qualification

Postgraduate Master's

Study Method

Full time

Award Title

MSc

Course Length

12 months

Faculty

Faculty of Engineering

Department

Mechanical and Aerospace Engineering

Entry Requirements

Normally a first-class or second-class honours degree (or international equivalent) in engineering or physical sciences, or equivalent professional qualification. A lower class degree may be considered with relevant work experience.

SCQF Level

11
