

## Computing (Technical Support)

Ayrshire College

### Venues

Kilwinning Campus

### Content

This course builds on the HNC. It covers all the key areas required for a technical support or networking role, including server administration, operating systems, security and routing, as well as introducing you to project management. At the end, you can also sit an exam in the Linux open source operating system if you wish.

The course covers:

Server administration skills; network server installation and maintenance; managing web servers; security concepts; routing technology; technical support procedures; managing a project; and maths skills in a computing context.
