

Carbon Management

University of Edinburgh

Venues

Central Campus

Content

With the MSc Carbon Management, students will have the opportunity to develop the skills and knowledge to engage critically with climate change debates and challenges for an equitable transition toward a resilient, low-carbon future.

This interdisciplinary programme is fast-paced and dynamic. Studies will draw widely on the latest research in the climate change field, plus case studies from Scotland and worldwide.

Industry experts, including alumni of the programme, also contribute to the discussions and provide guest lectures.

Throughout this interactive degree, students are encouraged to dive in and join the conversation, participate in group activities, and offer critical analysis of the topics. Together, students work to create a culture of positivity in how we think about and act towards the global climate crisis challenge.

Start Date

September

Qualification

Postgraduate Master's

Study Method

Part time (day)

Award Title

MSc

Course Length

2 - 3 years
