

Climate Change Management (PgCert)

University of Edinburgh

Venues

Off Campus

Content

Based upon the highly successful on-campus MSc Carbon Management, this online programme utilises a blend of interactive content, videos, virtual case studies and online discussions to explore the science and business responses to climate change.

You examine the leading ways in which the global climate change challenge can be addressed, covering adaptation and mitigation solutions across a wide range of sectors and regions. The programme is designed for those with a passion for tackling climate change and who require the flexibility that online learning provides.
