

Phonetics

University of Edinburgh

Venues

Central Campus

Content

This programme will give a comprehensive grounding in the theory and practice of phonetics. Students will learn the core phonetic topics of speech production, speech acoustics, and speech perception, and will learn how phonetics relates to many other language-related disciplines.

The programme has a strong practical emphasis. It is designed primarily for graduates wishing to continue studying phonetics at PhD level, and for those wishing to use phonetics as a tool for investigation in related fields, for example, historical linguistics, phonology, developmental linguistics, psychology, speech technology.

The taught MSc in Phonetics will provide students with an intensive grounding in phonetics and related disciplines, its methodologies, research questions, and techniques of research.
