

Human Clinical Embryology and Assisted Conception

University of Dundee

Venues

Ninewells Campus

Content

MSc Human Clinical Embryology and Assisted Conception is an established taught Masters course which provides a robust and wide ranging education in human clinical embryology and ART, while helping you to develop high level laboratory skills in various aspects of reproductive medicine.

The blend of scientific practical skills and the integration with an NHS facility will give you first-hand experience and exposure to the workings of an IVF clinic, and will provide an excellent base to enter a career in ART, either in a clinical or research setting.
