

Forensic Anthropology

University of Dundee

Venues

City Campus

Content

Forensic anthropology is the analysis of human remains for the medico-legal purpose of establishing identity. The discipline has adopted a pivotal role in UK and International investigations in cases of inter-personal violence and homicide, repatriation, mass disasters and war crimes.

This course provides you with training in dedicated laboratory areas with exclusive access to the unique skeletal collections in the Centre for Anatomy and Human Identification (CAHID). The programme offers a unique mix of theoretical subject matter combined with hands on practical experience which is delivered by case active academic staff who are world leaders in the field.

Start Date

September

Qualification

Postgraduate Master's

Study Method

Full time

Award Title

MSc

Course Length

12 months

Department

Science and Engineering

Entry Requirements

An honours degree at 2:1 or above (or equivalent) in a relevant biomedical science, or an ability to demonstrate considerable experience in a relevant field.

SCQF Level

11

Address

Nethergate
Dundee
Dundee City
DD1 4HN
