

Forensic Archaeology and Anthropology

University of Dundee

Venues

City Campus

Content

Forensic archaeology is the application of archaeological skills to the location and recovery of human remains and forensic evidence. Forensic anthropology is the analysis of human remains for the medico-legal purpose of establishing identity.

The MSc Forensic Archaeology and Anthropology course provides students with training in both disciplines in dedicated laboratory areas. You will have exclusive access to the unique skeletal collections in the Centre for Anatomy and Human Identification (CAHID).

You will develop the skills and knowledge required by those who undertake searches for missing people and will be involved in the recovery of remains from clandestine burials. You will also gain the skills required to present evidence as an expert witness in court.

Start Date

September

Qualification

Postgraduate Master's

Study Method

Full time

Award Title

MSc

Course Length

12 months

Department

Science and Engineering

Entry Requirements

An honours degree at 2:1 or above (or equivalent) in a relevant subject, or an ability to demonstrate considerable experience in a relevant field.

SCQF Level

11

Address

Nethergate
Dundee
Dundee City
DD1 4HN
