

Web Development (2nd year entry)

City of Glasgow College

Venues

City Campus

Content

On this course, you'll gain skills to start or advance a career as a web designer/developer. You'll learn to build dynamic websites that deliver content in a variety of formats for computers, smartphones and tablets.

Year 2 explores these subjects in more detail and introduces development technologies such as C#, API integration, web stacks and JavaScript frameworks such as Angular for application development. You'll learn how to create databases and how to integrate database content to web pages.

The course introduces both client and server side technologies with opportunities to prepare and develop web interfaces and multimedia-rich content utilising a range of Adobe products. The faculty has access to the Adobe suite which can be utilised to produce creative and engaging media content for inclusion within your websites.
