Architectural Technology

Edinburgh Napier University

Venues

Merchiston Campus

Content

An architectural technologist is a specialist in the technological aspects of building design and construction, bridging the gap between design theory and construction practice.
One of only two of its kind in Scotland, Edinburgh Napier University's accredited architectural technology course will teach you the skills required for a successful career in the industry, including the fundamentals in building design requirements from development through to completion.

You will learn key skills in areas of design and development so that you are proficient in advising on and working with innovative architecture technology. This course will help you gain a creative attitude and be skilled in detailing to design, using both graphic and computer-aided drafting techniques. With an architectural technology degree, you can work alongside architects and engineers to transform large-scale concepts into reality.

This course is accredited by the Chartered Institute of Architectural Technologists (CIAT) and host the CIAT Centre of Excellence, and is also accredited by the Chartered Institute of Building (CIOB).

Start Date

September

Qualification

Degree

Study Method

Part time (day)

Award Title

BSc Hons

Course Length

6 years

Department

Building and Surveying

Entry Requirements

2027 entry requirements

Standard entry:
4 Highers at BBBC.

Widening access entry:
4 Highers at CCCC.

For entry to year 2 you require 3 Advanced Highers at BBC plus Maths or Applications of Maths at National 5.

SCQF Level

10
