

Mechanical Engineering

Forth Valley College

Venues

Falkirk Campus

Content

This advanced course provides learners with a wide range of knowledge and skills required for mechanical engineering relevant to mechanical, manufacture, process, oil and gas and alternative energy industries.

The objective of the programme of study is to provide a broad understanding of mechanical engineering technologies. In addition, it develops organisational skills including project planning, maintenance strategies, methods of design analysis, leadership and interpersonal skills.

Students successfully completing this programme may have the opportunity to progress to a BEng or MEng at various Universities.

Start Date

August
