# Civil and Environmental Engineering

Abertay University

## Content

Study Civil and Environmental Engineering at Abertay and gain the knowledge and skills you need to become a Chartered Civil Engineer. Our Civil Engineering undergraduate degree is vocational and has industry work placements integrated into the course. There is a big shortage of civil engineers in Britain and Europe, making you hugely employable as soon as you graduate.

You'll gain a firm grounding across a wide range of civil and environmental engineering applications, with plenty of practical and hands-on experience through placements with industry partners such as Transport Scotland, Balfour Beatty and BEAR Scotland.

The BEng (Hons) / MEng Civil and Environmental Engineering is accredited by the Institution of Civil Engineers, the Institution of Structural Engineers, the Chartered Institution of Highways and Transportation and the Institute of Highway Incorporated Engineers.
