Civil and Environmental Engineering

Abertay University

Content

This course gives you plenty of hands-on experience and a firm grounding across a range of civil and environmental engineering applications. Build your CV with a 12-week work placement and learning in multi-disciplinary teams, just like the workplace.

In year two there's a team-based construction project. This is where you get to plan, project manage and construct scaled-down versions of real world structures such as bridges or wind turbine footings.

The BEng (Hons) / MEng Civil and Environmental Engineering is accredited by the Institution of Civil Engineers, the Institution of Structural Engineers, the Chartered Institution of Highways and Transportation and the Institute of Highway Engineers.

Start Date

September

Qualification

Degree

Study Method

Full time
