

Civil and Environmental Engineering

Abertay University

Content

By studying Civil and Environmental Engineering at Abertay, you'll gain the knowledge and skills you need to become a Chartered Civil Engineer. You'll also help contribute to the health and wellbeing of individuals, communities, and societies by understanding interactions between buildings, infrastructure, and the environment.

This degree will give you a firm grounding across a wide range of civil and environmental engineering applications, with plenty of practical and hands-on experience gained through industry partners, including Transport Scotland, Balfour Beatty, Sweco, BAM, and BEAR Scotland.

As you progress, you'll get a chance to work directly in the industry – an integrated part of your degree – and to take a deeper focus on specific areas that impact the built, human and natural environment.

The BEng (Hons) / MEng Civil and Environmental Engineering is accredited by the Institution of Civil Engineers, the Institution of Structural Engineers, the Chartered Institution of Highways and Transportation and the Institute of Highway Incorporated Engineers.
