

Environmental Science (Higher)

Inverness College UHI

Venues

Inverness Campus

Content

You will develop your knowledge and understanding of the interactions taking place between humans and the environment, the Earth's resources and sustainability, through a scientific treatment of the principles of ecosystems and contemporary resource use by society as a whole.

You will study a range of broad and up-to-date ideas relevant to the increasingly important role of environmental science in society.

The implications of these interactions for the future wellbeing of the environment in its widest context will be a central theme of the course.

The course will develop your scientific knowledge and experience by its consideration of principles, methods, data collection, interpretation and analysis. Investigative fieldwork will be conducted in local areas.

Start Date

August

Qualification

Higher

Study Method

Part time (day)

Course Length

1 year

Department

Science and Environment

Entry Requirements

Biology and Geography at National 5 at B or above.

SCQF Level
