

Engineering

Open University in Scotland

Content

This integrated masters degree combines undergraduate and postgraduate study, and we've designed the learning outcomes to fulfil the educational requirements for Chartered Engineer status. The course covers the techniques, concepts and knowledge required by professional engineers. You'll begin by exploring the fundamentals of this creative and analytical subject – using a range of methods underpinned by science and mathematics. Later you'll choose one of six areas in which to specialise. You'll get to work on real-life projects and team up with other students at residential schools to create innovative solutions to challenging problems.

Start Date

October, April

Qualification
