Healthcare with Health Science

Open University in Scotland

Content

Understanding health involves examining both scientific knowledge and healthcare practices. This certificate is relevant to employment in healthcare and health science. You'll examine what it's like to receive care, work in care services, and investigate particular health conditions. Drawing on science, maths, psychology and epidemiology, you'll explore the causes and patterns of ill health and disability, and how they affect individuals and populations. By the end of the course, you'll have developed a range of employability and study skills and an understanding of many significant health issues.

Start Date

October, February

Qualification

CertHE

Study Method

Online learning
